

ENVIRONMENTAL POLICY

Respect for our environment is one of our major concerns in the context of our industrial cleaning activity. It is also essential to our economic development and is the driving force behind an overall movement that includes our customers and suppliers.

For several years now, PARTNER'S SERVICE has been among the companies committed to an environmental approach designed to progressively reduce their ecological footprint. We are Monaco's first company to be ISO 14001 certified in our activity sector, and are now also a member of the Prince Albert II of Monaco Foundation and signatory of the Wood Charter against deforestation.

Our environmental management system applies to all our hygiene and cleanliness services.

Our initiative is designed to:

- Protect the environment and in particular prevent pollution;
- Ensure that our activities conform to compliance requirements;
- Take advantage of all possible opportunities for improvement.

Our priorities bear on the following areas:

- Reducing our contribution to global warming;
- Preventing all forms of sea pollution;
- Continuing to make progress in ecoresponsible purchasing of the products we use;
- Continuing to make progress in waste management.

Measurable objectives have been set and are monitored in the company dashboard. In order to achieve them, we must all take an active part in the initiative, to which I am assigning all necessary resources.

Our Environment Manager is tasked with maintaining and improving our practices, and reporting to me on our progress.

Monaco, 20 February 2018

Patrice DESSAIGNE
